EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Abstract, lines 3 and 7, "means has been changed to ---element---.

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach or disclose a high pressure discharge lamp starter device comprising, in combination with the remaining features of the claims, a control means supplies a lamp power larger than twice a rated lamp power, and which controls the starter circuit to reduce the lamp power such that the light output is not significantly larger than that of a stable light-emission time and the light output does not rapidly increase, when a metal halide charged in the high pressure discharge lamp is abruptly vaporized, and thereafter gradually reduce the lamp power so as to settle at the rated lamp power (claim 1); a first lamp power larger than twice a rated lamp power is supplied during a first time zone, a second lamp power is supplied during a second time zone, the second lamp power being reduced at a reduction rate of 1 to 8 W/second from the first lamp power, and a third lamp power is supplied during a third time zone (claim 2); control means controls the starter circuit to gradually decrease the lamp power so as to settle the rated lamp power while almost continuously increasing lamp voltage (claim 7); control means to

determine as to whether the lamp power should be reduced or not based on the light emission state of the high pressure discharge lamp when the lamp power is reduced in the state that the light amount of the high pressure discharge lamp is smaller than that during the stable time, and to gradually reduce the lamp power so as to settle at the rated lamp power when it is determined that the lamp power should be decreased, or increase and return the lamp power to the level before the lamp power is reduced, when it is determined that the lamp power should not be reduced (claim 8).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
